

Find Your Perfect Match

1. Please print the **Ring Size Chart**, in order to find your perfect fit. To ensure the guide is printed to actual size, set the page scaling to **100%** when selecting your print options.
2. Once printed, make sure the guide has been scaled correctly by measuring the Rebecca Elbek "ruler" at the bottom of the page - it should be **exactly 5 cm**.
3. Now place a ring that fits you over the circles, lining up the inner edge of the ring to the circle that matches your ring size. If your ring is in between two sizes, we recommend to choose the larger ring size.

No Printer? No Worries!

If you do not have access to a printer, you can also measure your ring size by measuring the inner diameter of a ring that perfectly fits the finger you want sized. Make sure you measure the center of the largest circle of the ring - this is the diameter. You can see the diameters of the ring sizes in the chart below.

Pro Tip

To get the best result, measure your finger when warm and preferably at the end of the day. The reason that we recommend this, is because your fingers are smaller when cold and early in the morning.
